STUDENTS

ACS/ASE MEDICAL STUDENT SIMULATION-BASED SURGICAL SKILLS CURRICULUM

A COMPREHENSIVE RESOURCE FOR MEDICAL SCHOOL AND CLINICAL FACULTY

The American College of Surgeons (ACS) and Association for Surgical Education (ASE) have collaborated to develop an exceptional new resource for medical school and clinical faculty: the ACS/ASE Medical Student Simulation-based Surgical Skills Curriculum. This joint program is available through the ACS Division of Education and can be accessed on the ACS website. It provides faculty with a national curriculum that offers medical students:

- Structured, uniform, and consistent learning experiences relating to the essential surgical skills needed by all physicians
- A solid foundation for further training

The simulation-based modules can be used to teach clinical skills ranging from taking a history and conducting a physical examination to performing basic surgical procedures. Topics are aligned with the year during which they are most commonly taught.

100+ years

AMERICAN COLLEGE OF SURGEONS

*Inspiring Quality:
Highest Standards, Better Outcomes*

ACS/ASE MEDICAL STUDENT SIMULATION-BASED SURGICAL

CONTENT INCLUDES:

YEAR 1	Module 1:	Abdominal Exam
	Module 2:	Basic Vascular Exam
	Module 3:	Breast Exam
	Module 4:	Digital Rectal Exam
	Module 5:	Female Pelvic Exam
	Module 6:	Male Groin and Genital Exam
	Module 7:	Universal Precautions
	Module 8:	Venipuncture and Peripheral IV
YEAR 2	Module 1:	Basic Airway Management
	Module 2:	Communication—History and Physical and Case Presentation
	Module 3:	Foley Bladder Catheterization
	Module 4:	Intermediate Vascular Exam
	Module 5:	Nasogastric Tubes
	Module 6:	Sterile Technique—Gloving and Gowning
	Module 7:	Surgical Drains—Care and Removal
YEAR 3	Module 1:	Arterial Puncture and Blood Gas
	Module 2:	Basic Knot Tying
	Module 3:	Basic Suturing
	Module 4:	Central Venous Line Insertion
	Module 5:	Communication—During Codes and Safe and Effective Handoffs
	Module 6:	Intermediate Airway
	Module 7:	Intraosseous IV
	Module 8:	Local Anesthetics
	Module 9:	Paracentesis
	Module 10:	Thoracentesis

SKILLS CURRICULUM

TAKE ADVANTAGE OF THESE FEATURES

The curriculum modules are self-contained and can be used as free-standing learning activities or in a stepwise fashion as part of the entire curriculum. Modules can be implemented in a proctored small or large group setting, or individually.

Features include:

- Objectives, assumptions, and suggested readings
- Step-by-step descriptions of techniques, tasks, and procedures with images
- Discussion of common errors
- Expert performance videos
- Assessment tools for scoring student performance and providing feedback
- Descriptions of the simulation laboratory models, including suggested stations, supplies, and set-up

CONVENIENT AND EASY TO ACCESS

The 25 modules are available at www.facs.org/education/program/simulation-based.

Faculty and students can access the modules by creating a personal log-in and password.

For additional information, please contact Krashina Hudson at khudson@facs.org or 312-202-5335.
