Kristina Dzara, PhD, MMSc [@kristinadzara8 hours ago](#)

[@mededdoc](#) It takes a lot of activation energy to approach a revision, especially one which has a lot of formative feedback. Recently worked through one & resubmitted. Thanks to great senior author and team members for guidance, otherwise would have felt insurmountable. [#MedEdChat#MedEd](#)

Anthony R Artino Jr [@mededdoc8 hours ago](#)

Avraham Cooper [@CooperAvraham8 hours ago](#)

[@GLBDallaghan](#) [@MedEdChat](#) T2 Start revising immediately. Major revisions are sort of a win-win: - Journal is expressing at least some interest in the paper/topic - Opportunity to improve the paper with focused feedback if you need to submit it elsewhere [#MedEdChat](#)

Kristina Dzara, PhD, MMSc @kristinadzara7 hours ago

@DrMedEd itor @MedEdChat I have been told that it is ok to ask for more time if it is needed. For example, major revisions or pre-planned travel that inhibits doing the work as quickly. I recently asked for an extension from a journal and the 15 days they provided was truly necessary. #MedEdChat
