Gary Beck Dallaghan [@GLBDallaghan8 hours ago](#)

[@LAS_Inc](#) T2 At [@UNC_SOM](#) the admissions committee members have to be trained on implicit bias in order to participate in the admissions interviews. Good practice. [#mededchat](#)

Deb Simpson [@debsimpson38 hours ago](#)

Interesting Q - as [@posucsf](#) et al focused on univ based/paid faculty... and significant amount of faculty who [#teach](#) [#UME](#) students and [#GME](#) residents are paid by [#HealthCareSystems](#) not owned by university/med school. I'd argue all are still present but fewer in #'s. [#MedEdChat](#)

ShereeseM, MS/MBA [@ShereesePubHlth8 hours ago](#)

[@GLBDallaghan](#) [@LAS_Inc](#) [@UNC_SOM](#) Yeah, but aren't those trainings a 1-time short training. Its been proven that they don't work. implicit bias is derived from things ingrained in us since infancy. Cognitive bias works from various angles. Today during online compliance module completion, the patients were referred as clients. Never once word patient was mentioned. It was surreal. Took me some time to get oriented. New age our learners have to adapt too as that is going to be norm! [#MedEdChat](#)

John Lowry PhD @DrJohn58858 hours ago

[@MedEdChat](#) Start with the changes needed for working physicians, then work backward to make residency more like it. Make step exams less important and more clinically relevant. Get pre-med to be more about how to learn and clinical experiences. [#mededchat](#)
