[@mmteacherdoc](#) Opinion from current [#medstudent](#), one thing I don't like about this tool is it uses numbers of experiences (work, volunteer, research) which may not correlate with significance of the work. Encourages quantity over quality on ERAS. [#MedEdChat](#)

Shireen Madani Sims, MD [@UFDOC8 hours ago](#)

[@helenjkmorgan](#) Also more transparency about fit and qualifications [#mededchat](#)

Jonathan Lim [@JonLimMD8 hours ago](#)

[@helenjkmorgan](#) Yeah... too many are geared toward opaque rankings or comparing applicant stats. Should be more about what programs offer, how they fit with a students' future career goals, unique opportunities, etc. [#mededchat](#)

Rick Hobbs [@RickHobbsMD8 hours ago](#)

T2: after interview season each year, while we work on rank lists, students run down their experience with each program. Helps me advise next year's students. More importantly, I learn new features about programs, address my own prior held beliefs, etc [#mededchat](#)

@Alliance4ClinEd @helenjkmorgan T2 : This process is so much more about introspection of how one learns and ones learning style /ideal learning environment - Knowing this well & then matching it effectively to a program is the first step- we as mentors and advisors can help play a role #mededchat

Shellie Asher, MD @SAsherMD8 hours ago

Gary Beck Dallaghan [@GLBDallaghan8 hours ago](#)
