[@MedEdChat](#) T2. [#mededchat](#). I am not a clinician, but I can imagine that the pandemic has so clearly illustrated: A) how fast evidence can change; B) how contradicting evidence can be, or can seem to be; C) how important it is to realize that we don't know what we don't know.

SWHerman @SW_Herman8 hours ago

[@angspenc](#) [@MedEdChat](#) Agreed! I think the current pandemic literature (primarily pre-prints) is a prime example of how important critical appraisal is. Just merely knowing how to critically appraise an article, even if we are still not 100% certain about the topic at hand would be helpful. [#MedEdChat](#)

Monica van de Ridder @MvdRidder8 hours ago

[@angspenc](#) [@MedEdChat](#) [#mededchat](#). Both are so important. Doing a good -systematic- appraisal, and being critical.
