[@Alliance4ClinEd](#) [@MedEdChat](#) [@TLMedEd](#) T2: Answer 1: if more primary care preceptors provided medication treatment, more students would see this care in chronic disease framework ([#telehealth](#) or in person). Gary Beck Dallaghan @GLBDallaghan8 hours ago
@MedEdChat @admsep T4 I'll be interested to hear what others say. With the pandemic the pivot toward that took priority....then social justice followed. #OUD fell by the wayside and the intersection of the two overlooked #mededchat
